政綱 Election Platform:

My platform is simple. If I am elected, I will truly democratise the process, by having an internal poll to decide every Engineering voting at LegCo. How the elected councillor votes is an effective message to the HKSAR government, but most people view that as bargaining chips for advantages to the councillor. Electing me is equivalent to selecting a polling mechanism that allows every member to vote directly on every LegCo issue. As councillor I will be more of a secretary and have less vested interest personally.

Since all members are highly trained professionals, you do not need a leader to tell you what or how to think. At most you need summaries of issues prepared for you and options laid out for discussion among you. This I vow will be my job as your councillor when an effective polling mechanism is setup. This is a campaign promise that can, and will, be delivered.

I hope this will set a precedence within or without the Engineering Constituency. This is the time, may be the only time, you can make it happen. Please vote.

我會以全體投票決定在立法會工程界的每一票,只會看管內部投票基制、條陳方案及作綜合報告,為議員減除個人利益行頭作先例。請投票。
