Hong Kong society is undergoing a cultural shock, with the Legislative Council being bombarded with antagonism and filibuster. There are concerns that society will progress no further in such political statement. Young people can neither find their future. People keep asking: Why can’t we be more rational and pragmatic? Should we not join hands in striving for a brighter future for Hong Kong?

Fully devoted to Hong Kong, DAB has been rendering full support to the Government for its good work. Otherwise, we have never been hesitant about criticizing it. And yet, we do not approve of paralysing the Government’s work and functions in performing our monitoring role. We need your support in injecting more positive and constructive energy into the legislature and in steering Hong Kong out of the present predicament. We need your support in realizing our vision. Come vote for Ann Chiang’s team.
