Election Platform

I have been working in the transport and logistics sector for over 18 years with a Master Degree in Management and Bachelor Degree in Engineering. I am a Chartered Fellow of The Chartered Institute of Logistics and Transport in Hong Kong and a Council member actively involved in transport and logistics related policies recommendation work since 2006.

In recent years, I dedicated much effort in enabling our sector's voice being heard across various offices of the Central Government by organizing delegations to Beijing whereby our sector members were able to discuss the sector's issues and challenges with the authority.

I am passionately looking forward to further serving our sector via the new term of the Legislative Council. Through close collaboration with my sector peers, I will continue to monitor government's formulation and implementation of related policies, anticipate their implications to our sector and raise our sector's voice pre-emptively. My goal is to foster the development of our sector with a vision of making Hong Kong one of the world's transport and logistics hub with new job opportunities for our next generations.
