1. While abiding strictly to both ‘One Country, Two Systems’ and ‘Hong Kong People Administering Hong Kong’, help build up a stable, harmonious atmosphere in society and a business environment, strengthen and enhance the standing of Hong Kong, as an international financial centre and as the global offshore RMB business hub.
2. Strive for different kinds of policies and measures that will benefit the financial development of Hong Kong by actively offering advice, on behalf of the industry, to both the governments of the Mainland and HKSAR. Use ‘Wealth Management Connect Scheme’ as breakthrough, grasping the business opportunities brought by the development of Guangdong-Hong Kong-Macau Greater Bay Area, to secure a foothold in the market and from there establish cross-border financial collaborations and development.
3. Strike a balance between operation safety and flexibility, through pooling the wisdom of the whole industry, by strengthening communications and interaction with the regulators.
4. Urge the HKSAR government to initiate an improvement programme on financial infrastructure, including the establishment of a central information and data bank. Promote technological innovation and application for the financial sector of Hong Kong, with a view to helping the banking industry to move forward in the transformation process to attain sustainable development. Endeavour to turn Hong Kong into a linchpin of Asia in the global financial technology network.
5. Facilitate the diversification of the finance industry, including into the fields of Green Finance and Financial Innovation. Provide exclusive professional service to the new economy, especially the emerging technology industry.
6. Improve the capability and standard of the Finance and Banking Industry, together with those of the other professional services, to support the Belt and Road Initiative, through multilateral collaborations and good teamwork, and hence strengthen the roles of Hong Kong as the leading financing centre, a superb liaison and a risk-management centre.
7. Implement ‘Financial Inclusion’, by mobilising the entire industry, such that the general public and small-sized enterprises can open and use bank accounts to fulfil their basic needs of funds management for daily lives or business operations.
